

## meridianSPECIALTY System

AmerisourceBergen®

# An Oncology EMR with an Integrated Chemotherapy Management Module

For more than 12 years, meridianSPECIALTY System has been improving the operational efficiency and financial viability of specialty providers, making it one of the longest-standing specialty Electronic Health Records in the market. Now, meridianSPECIALTY has been enhanced with functionality from IntelliDoseTxM, including treatment plan management, computerized physician order entry, nurse charting, and chart capture, making it the all-encompassing oncology platform that practices need.

The proven functionality and operational ability that has supported specialty practitioners since 2003 is oncology-specific and ready to use. Features include:

- Meaningful Use certified
- Treatment management powered by IntelliDoseTxM
- Oncology office visit and treatment summary templates
- Patient intake via the patient portal
- PQRS and Meaningful Use reporting and consulting services
- Order writing based on practice-defined treatment plan library

- Convenient point and click nursing tool to document care
- Charge capture module to automatically collect all charges for the chemotherapy encounter

The meridianSPECIALTY System integrates seamlessly with our mXchange network technology to allow physicians to operate in a secure environment with access to a broad range of patient information and interoperability. It features:

- Uninterrupted access to patient records through our blended model technology
- Computerized, effortless updates to templates, CPT codes and software
- Automatic backups to our server every few seconds
- A range of discrete data capture and useful research via the data analytics module

meridianSPECIALTY System integrates with Nucleus Inventory Management to ensure that all operations within your practice, from inventory management, to dosing, to EMR, are seamlessly connected.

Increase staff efficiencies. Improve patient safety. Further enhance your value proposition.
