

meridianSPECIALTY System

AmerisourceBergen®

meridianSPECIALTY System

Blended Model technology combines the best of client server and cloud-based systems. This unique approach consists of a high-speed local server at the practice while simultaneously connecting and saving the same data to the internet in real-time.

Benefits of the blended model

- Universal access to EHR — anywhere, anytime
- Accessibility from Mac®, PC, tablet, netbook, iPhone® and iPad®
- Access to all medical resources on the internet
- Database synchronization with all your offices and servers
- Automatic software distribution of templates and drug database updates
- Updates to automatic coding
- No connectivity needed between offices, saving time and money

Our exclusive Blended Model provides 100 percent uptime because your data is saved to two servers simultaneously — all the time. If your EHR Office Server goes down, you remain up and running.

Our Blended Model is facilitated by our proprietary mXchange™ technology, which provides seamless, bi-directional communications with patients, labs, PM

systems, other EHRs, pharmacies (eRx®), hospitals, HIEs (Health Information Exchanges) and many others.

**Data is centralized. Communication is secure.
Workflow is streamlined.**

Log in to either server for full access to all your data.
