

meridianSPECIALTY System

AmerisourceBergen®

Patient Portal

Patient Self-Service at its Best

This secure, easy-to-use data collection and communication tool streamlines workflow by allowing patients to enter and update their own clinical information, saving your staff valuable time. PatientPortal is fully compatible with meridianSPECIALTY System.

Meaningful Use tools

View lab results, clinical summary and patient education without requiring hardcopy printouts.

Simplify patient scheduling

Patients can request appointments from home with their personal computers or in your waiting room.

Time savings

Transition patients from the waiting room to the exam room quickly. Updated patient information will already exist in the EHR, facilitating more patient/provider quality time. Staff can also schedule more patients per day.

Reason for the appointment

Patients can enter the reason for their visit (chief complaint) and answer questions about it (HPI questions) before they ever enter the exam room, saving your staff additional time.

Current patient information

Patients can update demographics, allergies, medications, surgeries, diagnoses, family and social history and review of systems directly through the Patient Portal.

Features your patients will love

- Shorter wait times at your practice
- Quick access to their medical information
- Shorter overall appointment times
- Increased accuracy of their information
- Better communication with providers and family
- Access to educational materials online
- Faster lab results

Patient Check-in Made Easier

Optimize your Patient Portal with Patient Check-in featuring the Apple® iPad®.

Streamline your workflow

While the behind-the-scenes impact of EHR implementation has been growing rapidly, the average patient does not experience the immediate benefits of this technological boon. New access options like Patient Check-in via the user-friendly iPad, give patients the opportunity to have hands-on involvement in their own care.

Your patients will use a guided interview on the Patient Portal to enter and update their own demographic and medical information. Significant staff time is saved when patients enter their own information into the EHR.

Yet more time is saved in the immediate transfer of patient health information, accelerating waiting room to exam room workflow and shortening the overall length of a visit. This contributes to increased practice efficiency and productivity.

Technologically advanced and patient-focused, Patient Portal with Patient Check-in will not only change the way your practice sees new patients, but it will also enhance how new patients see your practice.

Add your branding

With protective custom cover options, you can design your in-office iPad devices to reflect your brand identity by using your practice's logo and color palette. Each new Patient Check-in iPad also features content specific to your practice and current record system.

User-friendly design

Featuring Apple's intuitive user environment, each iPad comes pre-loaded with step-by-step instructions. With basic directions, your patients can enter and update their own information, including time-consuming symptom and medication data.

Medication Detail Screen

Patient Portal uses the latest technology and has customizable features designed to enhance workflow:

- Patient messages
- Online patient education
- Online clinical summaries
- Published lab results
- Updated clinical information
- EHR integration

Future enhancements will also include: automated email reminders for appointments, oncology-specific self-assessments and in-home comfort measures.
