

Meaningful Use Service Track (MUST)

Taking your practice from registration to attestation – and covering everything else in between.

The Medicare and Medicaid Electronic Health Records (EHR) Incentive Program provides payments to eligible providers to encourage the adoption, implementation, upgrading or meaningful use of certified EHR technology.

As the industry leader in consolidating and standardizing real-world clinical data to provide healthcare providers reliable business intelligence, ION Solutions is proud to be at the forefront of tools and services that support Meaningful Use Attestation. As long as your practice is using any Meaningful Use Certified EHR, our MUST program will not only help you get your Meaningful Use incentive payment, but also ensure you keep it after an audit.

Our MUST program is a consulting service that addresses:

- Interpretation and workflow solutions for meeting Meaningful Use
- EHR Program Registration and Attestation Management
- Education and preparation for all Meaningful Use measures
- Audit oversight

Let us do the work of navigating through the evolving Meaningful Use criteria. For more information, email us at inside_sales_associate@intrinseq.com or call 1-877-570-8721 x2.

Nothing contained in these materials is to be considered as the rendering of legal advice for specific transactions or matters, and readers are responsible for obtaining such advice from their own legal counsel. This guide is intended for educational and informational purposes only. It does not contain a complete legal analysis and includes timely information that may eventually be modified or rendered incorrect by future legislative or judicial developments.

MUST Program

This comprehensive service will provide your practice with a full scope of Meaningful Use monitoring and management. Our Meaningful Use Analysts and custom checklists will help guide each member of your team (providers, nurses and administrative staff) through the required steps.

We offer:

- Step-by-step management through the entire Meaningful Use attestation process
- Security Risk Analysis documentation, guidance and support for your practice—which is a requirement for meeting Meaningful Use
- Creation of the “Book of Evidence” for potential audits
- Individualized reports regarding Meaningful Use status for eligible providers
- Notifications of regulatory changes via newsletters, emails and/or webinars
- Optional onsite attestation guidance for each physician
- A true partnership between your practice and our Meaningful Use Analyst
